

Evaluations Project

This is a project to help my users evaluate my work and design .

To install and run the project

```
install virtualenv >>>> pip install virtualenv
create venv >>>> virtualenv venv
Activate >>> source venv/bin/activate (linux)
Activate >>> source venv/Scripts/activate (windows)
```

Add .env file

create a file called .env
Add credentials to the db with the format in the .env_example

Migrations

Delete migrations file
make migrations >>>> python manage.py makemigrations django_app
migrate >>>> python manage.py migrate

Create a superuser

winpty python manage.py createsuperuser

Run the project

Python manage.py runserver

Browser access
